

Model HA90 Therapy Model

\$1750

During manipulation, therapy, or mobilization, the HA90 makes your job easier by elevating to the perfect work height. You will appreciate the reduction in bending and back stress and your patients will appreciate easy access onto the table provided by the variable height. Gliding quietly and smoothly, the HA90 elevates from 20" to 30" with a touch of the foot pedal. All mechanisms are completely enclosed to ensure safety for you and your patients. The standard HA90 has a 24" wide top with 1 1/2" foam. Various options such as 27" and 30" widths, an extra foot pedal, special-density foam, face cut-out, and a choice of height ranges allow you to customize the HA90 to your specific needs.
