Features and Options of the Hill A.F.T.

All features below are included in the standard model except for drops.

Automatic Flexion

Variable speed motorized flexion with convenient speed dial. Speeds from 1 -28 rpm.

Slide-Out Ankle Support

Extends 9"; and controlled by a lock lever switch. Includes ankle harnesses

Adjustable Height

Controlled with electric foot pedal. Choice of height range - 21.5" to 29" or 22.5" to 30"

Patient Gripper Bar

Patient squeezes lever and slides bar to adjust to comfortable length.

Tilting Headpiece

Hand lever releases headpiece to lock at any angle from 30° positive to 30° negative.

Patient Shut-Off

Equipped with a patient shut-off switch immediately cutting all table power when pressed.

Thoracic Release

Thoracic Abdominal Release locks at any angle down to 5" and up (above horizontal) to 3"

Optional Drops

Optional cervical, thoracic and pelvic drops may be added to the A.F.T. at additional cost.

Flexion Control Panel

The Flexion Control Panel is conveniently located at the end of the flexion cushion and allows you to set the flexion speed from 1 to 28 rpm. A selector switch permits the choice of stopping the table in a horizontal position or at any angled position.
