

Hill Air-Drop HA90C

\$4950

If you have used a manual drop table for any length of time, then you'll appreciate the impressive speed and ease of treating with the Air-Drop HA90C. Equipped with the Hill Air-Drop System, the HA90C allows doctors to select one or up to four drops simultaneously from the convenient, side-mounted, control panel. Once a section has been dropped, it is instantly reset with the simple touch of a foot pedal.

All of the pneumatic components on the Air-Drop HA90C are supplied by a large air-storage tank and mini-compressor which are neatly enclosed within the table's base skirting. The compressor runs quietly and only periodically (approximately 1 minute) to replenish the air-tank.

The table features an Air-Breakaway controlled by a foot pedal. The pedal increases or decreases the air-spring pressure in the thoracic and lumbar sections providing a controlled recoil action. It can also be locked in any position down to 51/2" for treating patients with a large abdominal region.

The drops included on the HA90C are Cervical, Thoracic, Lumbar, and Pelvic. The Cervical Drop has dual action enabling either straight or forward-drop action. An optional Toggle Headpiece is also available; see options below.

Like all Hill Adjustables, the Air-Drop HA90C has electric variable-height. Height is adjusted with a rocker foot pedal that is mounted to the base and can be accessed from either side of the table. An operating range from 23 1/2" to 32" allows the doctor to work at a comfortable treatment level. Tables are available in a choice of twenty upholstery colors with a base of either beige or gray. All Hill Tables come with a one-year warranty on all parts (see dealer on-site labor warranty).

Standard Features

- Electrically controlled height - 23 1/2" to 33" (Low height available - 21 1/2")
- Tilting Headpiece - 30° negative and positive tilt
