

Two Section Physical Therapy Table

Base Price \$2035

During examination, therapy or mobilization, the Two-Section PT Table makes your job easier by elevating to the ideal working height. The gas spring-powered lift-back feature allows you to position your patients with ease and locks instantly at any angle up to 80° by releasing the button. You'll appreciate the reduction in bending and back stress, and your patients will enjoy the easy access onto the table provided by the variable height. Gliding quietly and smoothly, the Two-Section PT elevates from 22" to 35" with a touch of the foot pedal. All mechanisms are completely enclosed to ensure safety for you and your patients. The standard model has a 24" wide top with 1 1/2" foam. Various options such as 27" and 30" widths, an electric back, an extra foot pedal, special-density foam, face cut-out, and a choice of height ranges allow you to customize to your specific needs.

Shown with optional Face Cut-Out
