

Hill Counterstrain Table

Base Price \$3995

Ideal for examination or manipulation, the Hill Adjustable Counterstrain Table is the ultimate positioning table for the osteopathic physician. You'll appreciate the reduction in bending and back stress and your patients will enjoy the easy access onto the table provided by the variable height. Gliding quietly and smoothly, the Counterstrain elevates from 22" to 35" with a touch of the foot pedal. All mechanisms are completely enclosed to ensure safety for you and your patients. The standard model has a 24" wide top with 2 1/2" foam.
