PT Mobilization Table

Base Price \$2395

The Hill Adjustable Model 90PT electrically adjusts in height to offer easy access for your patients and minimize back stress for you. Its three-section top is designed specifically for physical therapists and includes in one table, features for examination, mobilization, and therapy.

The gas spring-powered lift-back feature allows you to position your patients with ease and locks instantly at any angle by releasing the button. The tilting headpiece on the 90PT can be locked in any position from 35° positive to 85° negative. For patient comfort, the entire 90PT is padded with 2 1/2" of medium-density foam. A padded insert fills the face cut-out when needed.

Swing-out arm rests provide arm support for your patients in the prone position and rotate under the table top when not in use.

The foot pedal can be conveniently positioned on either side of the table. A durable telescoping base safely encloses all mechanical parts. The P.T. Mobilization Table has a one-year warranty on all parts and labor and is UL® approved.
