### Rath Mechanical Table

Base Price \$2650

Hill Laboratories Company, together with Wayne Rath P.T., developed the adjustable-height Rath Mechanical Treatment Table specifically for use with the well-known McKenzie Technique. The Rath Mechanical makes flexion or extension positioning of your patient easy with a touch of the electric foot pedal. Table movement can also be directly controlled by the patient with a convenient, 12-volt hand switch which neatly fastens under the table-top when not in use.

A rocker foot pedal allows the Rath Mechanical to be adjusted in height from 22" to 35" from either side of the table providing the ideal working height for mobilization, therapy and examinations. Widths range from the standard 24" to 27" and 30".

A durable telescoping base safely encloses all mechanical parts.

### STANDARD FEATURES

- 30° negative and 90° positive tilting back. Controlled by foot pedal and/or 12-volt hand switch.
- Restraint belt
- Protractor for angle measurement
- Adjustable foot board for stabilization
- Face cut-out with insert
- Height range from 22" to 35" controlled by foot pedal
- Rocker foot pedal controls height from either side of the table
- Standard 24" width
