

**Hill Podiatry Table**

**Base Price \$3595**

The Hill Adjustable Podiatry Model is designed with several features usually associated with far more expensive podiatry chairs. Powered by electric actuators, the HA90P has three distinct adjustable motions. Adjustable height provides a comfortable 23" to 36" working range. A recline feature tilts the entire chair to any desired angle. The electric tilt back may be completely lowered to convert the HA90P to a flat table. Special features include a pull-out foot section for taller patients; a removable, adjustable-angle, stainless steel pan; an adjustable headpiece for patient comfort; and fold-back armrests.

**Standard Features**

- Electric foot-pedals to control height, back, and tilt angle of seat
- Height range from 22" to 35" or 24" to 37"
- Foot section extends within a 12" range
- Removable stainless steel pan slides out of sight under foot section
- Fold-up arm rests
- Width - 24"
- Choice of 20 upholstery colors with gray or beige base

**Optional Features**
